Full Stack Web Developer | Software Engineer

Skills

Languages & Frameworks

Back End: Python, Django, FastAPI, Flask, Node.js

Front End: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, jQuery, Angular

Mobile: React Native

Styling Tools & Frameworks

Tailwind CSS, Bootstrap, SASS/SCSS, Less, PostCSS

UI/UX & Design Tools

UI/UX Principles, Figma, Canva

APIs

REST APIs, SOAP APIs, JWT, OAuth2, GraphQL

Databases

Relational (SQL): PostgreSQL, MySQL, SQLite, MariaDB, BigQuery

Non-relational (noSQL): MongoDB, CouchDB, Firebase, Redis

Data Modeling

DevOPS, Cloud & Testing

Version Control: Git, GitHub, GitLab, BitBucket, Google Cloud Source Repositories

Continuous Integration/Continuous Delivery (CI/CD): GitHub Actions, Jenkins

Clouds: Amazon Web Services (AWS), Google Cloud Platform (GCP), Vercel, Netlify,

Heroku

Amazon Web Services (AWS): EC2, RDS, S3, Amplify, Lambda

Google Cloud Platform (GCP): BigQuery, Cloud Functions

Containers & Orchestration: Docker, Docker Compose, Docker Swarm, Kubernetes (basics)

Infrastructure as Code (IaC): Terraform, Ansible

Web Servers & Reverse Proxy: Nginx

Software Testing: TDD, End-to-end(e2e) automation with Selenium and Cypress, unit testing with Pytest, Mocha and Jest, CI/CD pipelines integrating automated test suites

Content Management & Web Builders

WordPress, Elementor

Architectures

Monolithic Architecture, Layered Architecture, Pipeline Architecture, Microkernel

Architecture, Microservices, Serverless

Latest Professional Experiences

Custom Software Engineering Analyst | Mid-level Full stack Developer – Accenture

01/2025 – Current

[Fundação Renova / Samarco, Tim, Easy HR]

- Developed smart automations using Pipefy to streamline workflows and enhance operational efficiency.
- Continuously improved automation scripts with a focus on performance, scalability, and code readability.
- Designed and maintained modern, secure, and market-aligned architectures ensuring maintainability and reliability.
- Collaborated with distributed teams using Git, agile methodologies (Scrum/Kanban), and task/version control tools.
- Built and maintained RPAs and web scraping routines, automating critical processes and reducing operational overhead.
- Developed backend systems in Python, following clean code principles and best practices.

Full Stack Developer – Indra Energia

09/2024 – 01/2025 (Contract)

- Contributed to the development and maintenance of web applications supporting energy trading and customer retail operations, improving internal tools
- Helped reduce API response times by up to 30% through optimization efforts using FastAPI, caching techniques and asynchronous programming
- Assisted in migrating legacy components to containerized environments using Docker and Docker Compose, improving deployment consistency and reducing environment-related issues by 40%
- Collaborated on frontend development, leading to a 15% improvement in user satisfaction based on internal feedback, by enhancing UI responsiveness.
- Supported the team in identifying and resolving bugs, contributing to a 20% reduction in post-deployment incidents.

Web Developer – Vitta Group Franchising

10/2023 – 12/2024 (Contract)

- Development of applications in React.js
- Project, implementation, and maintenance of APIs using JavaScript, Node.js, and Django, including RESTful APIs
- Creation, modeling, and administration of PostgreSQL databases
- Utilization of Postman for API testing
- Configuration of Linux VPS server to host React applications with Django Back-End using Nginx
- Development of scripts for task automation and productivity enhancement
- Development and maintenance of Landing Pages with WordPress and Elementor for design and layout
- Performance analysis and implementation of SEO

Full Stack Developer – Mont Capital Asset

04/2024 – 08/2024

- Contributed to the development of backend services using Python (Django, Flask, FastAPI), working alongside other engineers to deliver scalable and well-tested APIs
- Assisted in the development and maintenance of frontend features using React, TypeScript, Material UI, and Styled Components, enhancing UI consistency and responsiveness
- Collaborated on projects involving WebSockets and real-time communication using Socket.io, improving system interactivity
- Worked with SOAP/REST APIs and external web services to integrate financial data sources into internal systems
- Participated in containerizing services using Docker, Docker Compose, and basic Kubernetes setups for development environments.
- Managed and queried relational and non-relational databases including PostgreSQL, MySQL, and MongoDB
- Contributed to deploying applications using AWS EC2, S3, and RDS, reducing deployment time by ~30% through automation scripts.
- Collaborated in a small agile team and helped deliver over 10 features and bug fixes across the stack during my time on the project.
- Wrote unit tests for backend services, increasing code reliability and contributing to 10–15% higher test coverage on some modules.

IT Analyst / Automation Developer

04/2024 – 08/2024

- Developed scripts using Python and PowerShell to automate tasks such as installation, configuration, and computer management. These automations reduced setup time from over an hour to 15 minutes or less.
- Assist and guide users in the use of IT tools.
- Assist in user internet support.
- Aid in supporting users with intranet and internet emails.
- Assist in system maintenance.
- Installation of physical printers and through the server.
- Proficient in Linux, Windows, and Mac OS operating systems.
- MySQL database management.
- Proficient in the Microsoft Office suite.
- Computer networks expertise.

Certifications

AWS Certified Developer – Associate (In Progress)

Languages

English: Upper-Intermediate (B2 / C1)

Japanese: Intermediate to advanced

Proficiency Certificate - 日本語能力試験(三級) - JLPT (Japanese Language Proficiency Test) - N3

Portuguese: Native

About Me

I'm a software engineer with 3 years of experience in the tech industry, passionate about building scalable and meaningful solutions. I bring a solid foundation in full stack development, working across backend, frontend, cloud services, and DevOps practices.

Known for being proactive, detail-oriented, and highly adaptable, I thrive in collaborative environments where complex challenges require creative and efficient solutions. My curiosity drives me to stay current with emerging technologies, and my commitment to clean, maintainable code ensures long-term value for the teams and projects I contribute to.
